What's New at SCUBA Travel?

Diverse Diving in Mexico

The variety of Mexico's diving can not be beaten. From the Cenote flooded cave systems, to the wild Pacific coast, the popular Caribbean island of Cozumel, the white sharks of Guadalupe and the marvellous marine life of Baja California including the large pelagics at Socorro Island.

Diving News From Around the World

Our round up of the best underwater news stories of the past month. For breaking news see our [Twitter page](#) or [RSS feed](#)

[Red Sea bans single use plastics](#)

The ban covers items including disposable plastic bags, cutlery and cups, and aims to protect the area's unique sea life.

[AI to shed light on deep sea species](#)

With increasing threats facing the marine environment, scientists desperately need more information about what inhabits the seabed in order to inform conservation and biodiversity management.

[New subspecies of pilot whale discovered after 250-year-old theory proved correct](#)

Short-finned pilot whales are found over a wide swath of the world's oceans, with habitats in the Indian, and Pacific, and North Atlantic oceans. Despite this wide distribution, the whales have been recognised as a single species—but a recent study has found that two unique subspecies actually exist.

[10% off Diving in Italy](#)

Diving the Archipelago Toscano Marine Park, with wrecks, caverns and drop offs. 10% off at Argentario Divers with code 'ScubaTravelUK2019'

[Sperm whale to dugong: where to see Australia's marine life](#)

Study reveals the migration paths, mating and feeding habits of Australia's most majestic sea life with interactive tool. Follow the path of some of the world's most fascinating marine animals on their migration or use the tool to visit their key nesting and feeding locations.

[Climate driving new right whale movement](#)

Scientists discover that rapid warming in the Gulf of Maine's depths is changing food availability and increasing risk to one of the world's most endangered animals

[Changing how we predict coral bleaching](#)

Coral bleaching events may occur more frequently in the Red Sea than previously thought, according to an algorithm developed by KAUST researchers. Their findings also indicate that the northern part of the Red Sea might not remain a thermal refuge for coral ecosystems for long.

[To Save the Whales, Crab Fishers Are Testing Ropeless Gear](#)

From devices designed to automatically cut the line, to crab pots that use no ropes at all, scientists are working to ease the threat posed

by trap fishing.

[New Nudibranch species discovered in Europe](#)

Divers searched for sea slugs around Europe: in the UK, Ireland, Norway, Sweden, Spain, Italy, France, Croatia and Russia. Even though the European nudibranch fauna is one of the best studied in the world, after detailed analysis of the specimens the scientists declared three new species.
